## Our Spring Walk

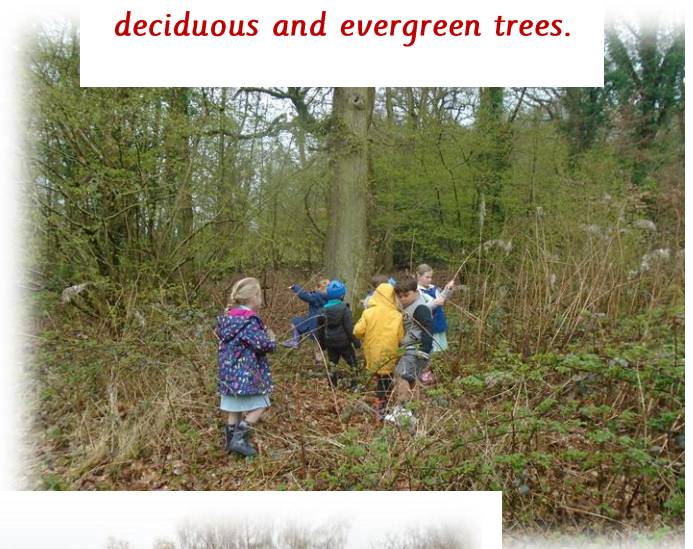

We had a lovely walk over Whitcliffe Common to look for different signs of spring and to see how many different plants we could identify. We recorded what we found on our clipboards.

When we were looking for frog spawn and tadpoles we found a toad hiding in a shallow part of the river.

*We are beginning to recognise deciduous and evergreen trees.*

*We saw the new leaves growing on the trees.*

*We had lots of fun!*

*We hunted for different plants and we used our checklist to help us identify them.*

*We thought about why plants did not grow on these rocks – “there is no soil and it’s too dark”.*
