

## CALCULATION POLICY: ADDITION AND SUBTRACTION

### Mental calculation strategies for addition and subtraction:

All these mental calculation strategies are taught explicitly using a Concrete – Pictorial – Abstract (CPA) approach in every year group, for example, extending to decimals in upper Key Stage 2.

#### Number bonds: $7 + 3 = 10$

$$70 + 30 = 100$$

#### Bridging: $7 + 5 =$

To begin:  $7 + 3 = 10$  Then:  $10 + 2 = 12$

Bridging through 60 for time, i.e. 70 minutes = 1 hour and 10 minutes.

Bridging through decimals

#### Doubles: $8 + 8 = 16$

$8 + 8$  is connected to  $8 \times 2$

Add decimals using knowledge of doubles e.g.  $0.8 + 0.8 = 1.6$

#### Adjusting: $16 + 9 = 25$

To begin:  $16 + 10 = 26$

Then:  $26 - 1 = 25$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50

#### Near doubles: $6 + 7 = 13$

$6 + 7$  is commutative with  $7 + 6$

Add decimals using near doubles, e.g.  $2.5 + 2.6 = 5 + 0.1$

#### Finding the difference: $10 - 6 = 4$

David has 10 sweets and Chloe has six sweets. How many more does David have than Chloe?

#### Partitioning: $14 + 12 = 26$

Add decimals using partitioning e.g.  $1.4 + 1.2 = 2.0 + 0.6 = 2.6$

#### Reordering: $8 + 7 + 2 = 17$

e.g. calculating numbers in a different order

To begin:  $8 + 2 = 10$

Then:  $10 + 7 = 17$

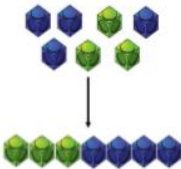

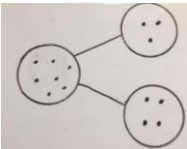

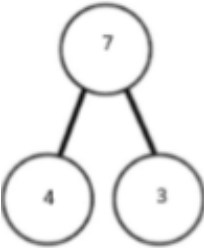

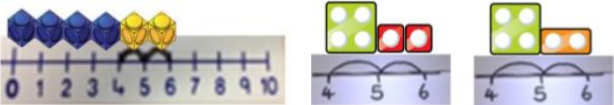

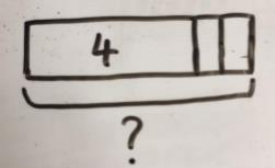

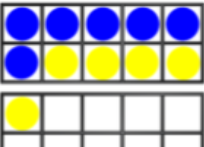

Reorder increasingly complex calculations

e.g.  $1.7 + 2.8 + 0.3 = 1.7 + 0.3 + 2.8$  or  $4.7 + 5.6 - 0.7 \dots$

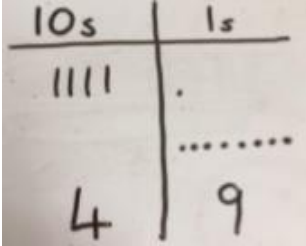

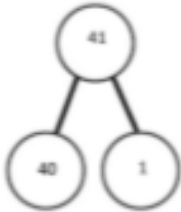

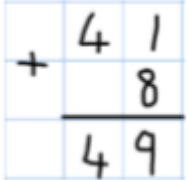

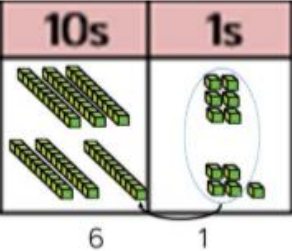

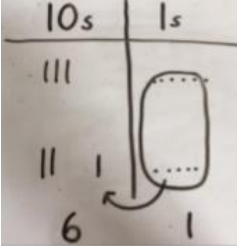

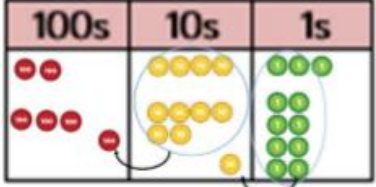

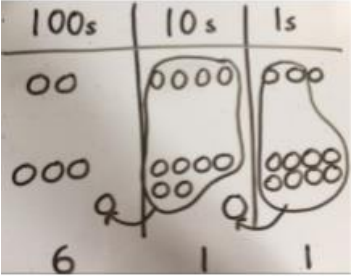

$4.7 - 0.7 + 5.6 = 4 + 5.6$ .

e.g. $0.8 + 0.35 = 0.8 + 0.2 + 0.15$			
--------------------------------------	--	--	--

ADDITION			
Key Language: sum, total, part, whole, add, plus, altogether, more, is equal to, is the same as			
Concrete	Pictorial	Abstract	
<b>Combining two parts to make a whole</b> (using multilink, teddy bears, cars, shells). 	Children represent cubes using dots or crosses. (Could include drawing parts in a part-part-whole model) 	$4 + 3 = 7$ 4 is a part, 3 is a part and the whole is 7. 	
<b>Counting on using number lines</b> (using cubes or Numicon) 	A bar model which encourages children to count on rather than count all. 	The abstract number line: What is 2 more than 4? What is the sum of 2 and 4? What is the total of 4 and 2? $4 + 2$ 	
<b>Regrouping to make 10</b>	Children to draw the ten frame and counters/cubes. 	Children develop an understanding of equality $6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$

### Adding decimals

Using place value counters.

$$3.45 + 4.14$$

$$0.453 + 0.664$$

Children represent the counters in a place value chart, circling when they make an exchange

Column Method: Regrouping

$$3.45$$

$$+ 4.14$$

$$\underline{7.59}$$

$$0.453$$

$$+ 0.664$$

$$\underline{1.117}$$

$$1 \quad 1$$

## SUBTRACTION

### Key Language:

take away, less than, difference, subtract, minus, fewer, decrease, reduce

### Taking away ones

Physically removing objects from a whole (ten frames, Numicon, cubes, bean bags etc).

4 take away 3

Children draw objects (or circles) and cross out the correct amount. The bar model can also be used.

$$4 - 3 =$$

$$\boxed{1} = 4 - 3$$

### Counting back

Using number lines or number tracks.

6 count back 2

Children represent what they see pictorially e.g.

Children represent the calculation on a number line or track (including an empty number line)

$$6 - 2 =$$

### Finding the difference

Using cubes, Numicon, Cuisenaire rods etc.

How many more is 8 than 5?

Children draw the concrete objects they have used or use the bar model to illustrate what they need to calculate.

Find the difference between 8 and 5

$8 - 5 = 3$  so the difference is 3

Children explore why  $9 - 6 = 8 - 5 = 7 - 4$

### Bridging 10

Making 10 using 10 frames

$14 - 5 =$

Children represent the ten frame pictorially and say what they did to make 10.

Children show how they can make 10 by partitioning the subtrahend.

$$\begin{array}{r} 14 - 5 = 9 \\ \swarrow \quad \searrow \\ 4 \quad 1 \\ 14 - 4 = 10 \\ 10 - 1 = 9 \end{array}$$

### TO-TO – No exchange

Using base 10

Children draw base 10 pictorially

Column Method

Expanded:

$$\begin{array}{r} 40 + 7 \\ - 30 + 2 \\ \hline 10 + 5 = 15 \end{array}$$

Compact:

	T	O
	4	7
-	3	2
	1	5

### Column Method with exchange

Using base 10

$41 - 26$

Children represent the base 10 pictorially, showing the exchange.

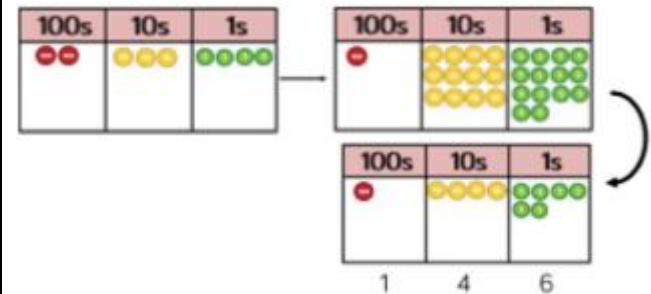

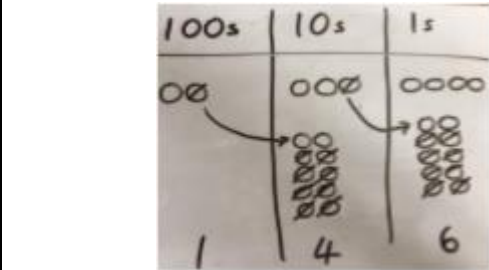

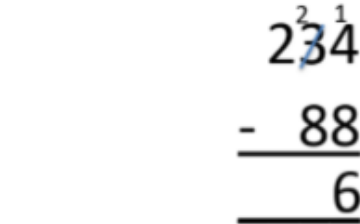

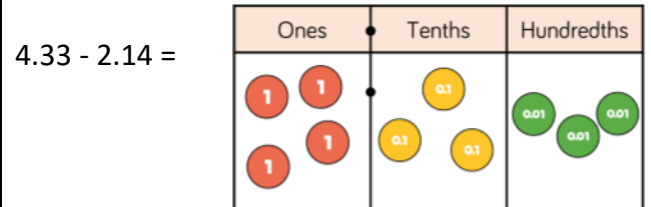

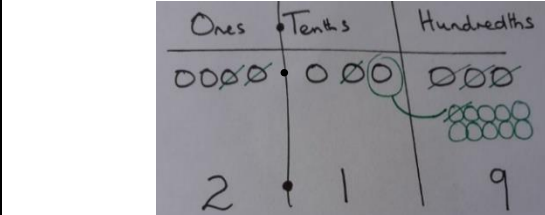

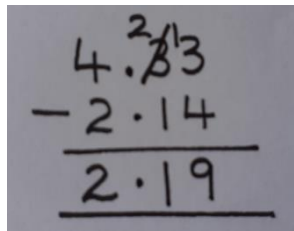

Column Method

Children must understand what has happened when they have crossed out digits.

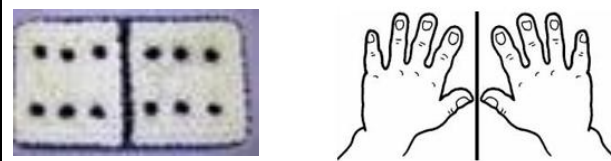

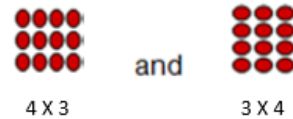

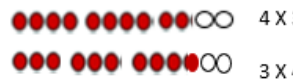

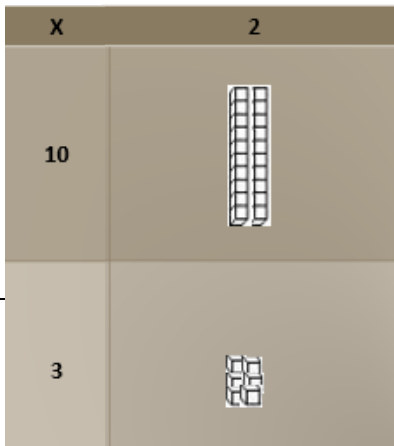

$$\begin{array}{r} 30 \quad 1 \\ 40 + 1 \\ - 20 + 6 \\ \hline \end{array}$$

	3	1
-	4	1
	2	6
	1	5

Column Multiplication (No regrouping)

Base 10  
34 x 2

Informal method  
(partitioning)

$$34 \times 2 = 30 \times 2 + 4 \times 2$$
$$= 60 + 8$$
$$= 68$$

Expanded method

10s	1s
3	4
x 2	
	8
6	0
6	8

$2 \times 4 \text{ ones} = 8 \text{ ones}$   
 $2 \times 3 \text{ tens} = 6 \text{ tens}$

Compact layout with headings

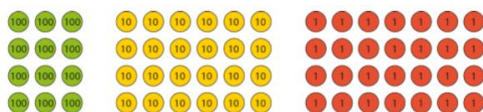

10s	1s
3	4
x 2	
	8
6	0
6	8

Compact layout

$$\begin{array}{r} 21 \\ \times 4 \\ \hline 84 \\ \hline \end{array}$$

Column Multiplication (With regrouping)

Place Value counters  
367 x 4 =

Multiplication algorithm – expanded layout:

1,000s	100s	10s	1s
	3	6	7
x 4			
		2	8

Multiplication algorithm – compact layout:

$$\begin{array}{r} 367 \\ \times 4 \\ \hline 1468 \\ \hline \end{array}$$

Last Reviewed: May 2023

Next Review: May 2026

**Regroup 1s**

**Regroup 10s**

**Regroup 100s**

$4 \times 7 \text{ ones} = 28 \text{ ones}$   
 $= 2 \text{ tens} + 8 \text{ ones}$

$4 \times 6 \text{ tens} = 24 \text{ tens}$   
 $= 2 \text{ hundreds} + 4 \text{ tens}$

$4 \times 3 \text{ hundreds} = 12 \text{ hundreds}$   
 $= 1 \text{ thousand} + 2 \text{ hundreds}$

### Column Multiplication – Multiplying by 2-digits

Up to 4-digits by a 2-digit e.g.  $18 \times 13$

Grid:

	10	8
10	100	80
3	30	24

Expanded:

$$\begin{array}{r}
 18 \\
 \times 13 \\
 \hline
 24 \\
 30 \phantom{0} \\
 80 \phantom{00} \\
 \hline
 100 \phantom{0} \\
 234
 \end{array}$$

Compact:

$$\begin{array}{r}
 18 \\
 \times 13 \\
 \hline
 54 \\
 2 \phantom{0} \\
 180 \phantom{0} \\
 \hline
 234
 \end{array}$$

When multiplying 3 and 4-digit by 2-digit etc, children should be confident with the compact method.

$$\begin{array}{r}
 1 \phantom{0} 2 \phantom{0} 4 \\
 \times \phantom{0} 2 \phantom{0} 6 \\
 \hline
 7 \phantom{0} 4 \phantom{0} 4 \\
 \phantom{0} 1 \phantom{0} 2 \phantom{0} 0 \\
 \hline
 3 \phantom{0} 2 \phantom{0} 2 \phantom{0} 4 \\
 \phantom{0} 1 \phantom{0} 1 \phantom{0} 0 \phantom{0} 0 \\
 \hline
 \end{array}$$

### DIVISION

Key Language:

# share, group, divide, equally, divided by, half, halve, remainder

## Sharing using a range of objects

$$6 \div 2 =$$

"Two children share six pencils between them"

Represent the sharing pictorially.

$$6 \div 2 = 3$$

Children should also be able to use their 2 times tables facts

## Repeated subtraction

Using Cuisenaire rods:

3 groups of 2

Represent repeated subtraction pictorially:

Abstract number line:

## Sharing using place value counters or base 10

Use knowledge of tables facts /inverse.

Using place value counters:  $42 \div 3 =$

Represent place value counters pictorially

Children demonstrate their understanding of place value counters and write calculations to show the process.

E.g.  $42 \div 3$

$$42 = 30 + 12$$

$$30 \div 3 = 10$$

$$12 \div 3 = 4$$

$$10 + 4 = 14$$

Last Reviewed: May 2023

Next Review: May 2026

### Division with remainders

Using counters, lollipop sticks or other materials

$$13 \div 4 =$$

*'Twelve is the largest multiple of four that is less than or equal to thirteen.'*

Represent grouping counters or other materials

$$13 \div 4 = 3 \text{ remainder } 1$$

Number line

*'Thirteen divided into groups of four is equal to three with a remainder of one.'*

### Short Division (No remainder)

$$84 \div 4 =$$

Sharing

Using place value counters

$$\begin{array}{r} 10s \quad 1s \\ 4 \overline{) 84} \\ \underline{8} \quad \underline{4} \end{array} \quad \begin{array}{l} 8 \text{ tens} \div 4 = 2 \text{ tens} \\ 4 \text{ ones} \div 4 = 1 \text{ one} \end{array}$$

$$\begin{array}{r} 10s \quad 1s \\ 4 \overline{) 84} \\ \underline{8} \quad \underline{4} \end{array}$$

### Short Division with remainder

Step 1 – write the divisor and dividend

Step 2 – sharing the tens...

Step 3 – ...and exchanging

Step 4 – sharing the ones

## Dividing by 2-digits:

$$434 \div 31 =$$

Partitioning

$$310 \div 31 = 10$$

$$124 \div 31 = 4$$

$$434 \div 31 = 14$$

Short division

$$\begin{array}{r} 0 \quad 1 \quad 4 \\ 31 \overline{) 4 \quad 3 \quad 4} \end{array}$$

Long division

$$\begin{array}{r} 0 \quad 1 \quad 4 \\ 31 \overline{) 4 \quad 3 \quad 4} \\ \underline{3 \quad 1} \quad \downarrow \\ 1 \quad 2 \quad 4 \\ \underline{1 \quad 2 \quad 4} \\ 0 \end{array}$$

## Dividing by 2-digits with remainder: Long division

$$354 \div 15 =$$

Remainders should be rounded as appropriate to the context.

In some cases, the decimal and proper fraction remainder are both appropriate.

$$\begin{array}{r} 2 \quad 3 \quad r9 \\ 15 \overline{) 3 \quad 5 \quad 4} \\ \underline{3 \quad 0} \phantom{0} \\ 5 \quad 4 \\ \underline{4 \quad 5} \\ 9 \end{array}$$

$$\text{So, } 354 \div 15 = 23 \text{ r } 9$$

$$\begin{array}{r} 2 \quad 3 \quad \frac{9}{15} \\ 15 \overline{) 3 \quad 5 \quad 4} \\ \underline{3 \quad 0} \phantom{0} \\ 5 \quad 4 \\ \underline{4 \quad 5} \\ 9 \end{array}$$

$$\frac{9}{15} = \frac{3}{5}$$

$$\text{So, } 354 \div 15 = 23\frac{3}{5}$$

$$\begin{array}{r} 2 \quad 3 \quad . \quad 6 \\ 15 \overline{) 3 \quad 5 \quad 4 \quad . \quad 0} \\ \underline{3 \quad 0} \phantom{00} \\ 5 \quad 4 \phantom{0} \\ \underline{4 \quad 5} \phantom{0} \\ 9 \quad 0 \\ \underline{9 \quad 0} \\ 0 \end{array}$$

$$\text{So, } 354 \div 15 = 23.6$$

## Calculation Policy: Guidance

Many of the representations in this policy have been taken from the NCETM Primary Mastery Materials and from the White Rose Maths Calculation policy. As some calculation methods are applicable to more than one year group, this policy instead details the progression in calculation skills and representations. The table below highlights where methods fit with the requirements of the National Curriculum.

	EYFS/ Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Addition</b>	Combining 2 parts to make a whole. Counting on using number lines. Regrouping to make 10.
